Objective:

A highly motivated professional with over five years of hands-on experience in networking and virtualization at Creative Group. Equipped with a Computer Systems Technician diploma from George Brown College and a solid foundation in Windows Server 2016, Cisco networking, network automation, and DevOps practices. Eager to contribute to a dynamic team in a role such as Systems Administrator, Network Administrator, Cloud Infrastructure Engineer, DevOps Engineer, or Virtualization Engineer, driving innovative solutions in network management and cloud infrastructure.

Highlights of Qualifications:

- Extensive experience in network virtualization and infrastructure management.
- Proficient in Windows Server (2008-2016) and Active Directory management.
- Knowledgeable in VLAN, routing, NAT, and VPN protocols.
- Experienced with VMware across various virtual environments.
- Possess strong troubleshooting and problem-solving skills in Linux environments.
- Skilled in managing cameras, Cisco routers, and various networking devices.
- Management of system security, backup/recovery, and performance optimization.

Technical Skills:

- Configure and manage VLANs, Wi-Fi, routing, NAT, VPN, and iSCSI, alongside Windows Server administration (2008, 2012, 2016) with Active Directory.
- Utilized Linux for secure connections and network automation, implementing security measures through alternative solutions.
- Manage virtualization with VMware Workstation PRO, VirtualBox, and Raspberry PI 5, while working with on-premises infrastructure and Microsoft Azure.
- Administered databases including MS SQL, MySQL, and Microsoft Access, and managed SonarQube server configurations, ensuring seamless integration with these databases.

Soft Skills:

- Self-motivated and detail-oriented, with a strong focus on solving problems and getting network settings right.
- Collaborative team member with strong communication skills, able to work well with different teams and explain technical ideas clearly.
- Quick to learn and adapt to new technologies, applying them effectively.
- Patient and organized, managing time well to meet deadlines and complete tasks thoroughly.

Education:

Computer System Technician, Diploma
George Brown College, Toronto, ON

January 2024 – April 2025

- Diploma awarded April 2025.
- Enhanced skills in Windows Server administration and Linux system management.
- Gained experience in network automation, DevOps, and advanced Cisco setup.
- Completed coursework in Python, web development, and automation scripting.

Network and Operating System, Bachelor
ESPOL University, Guayaquil, Ecuador

May 2012 – July 2014

- Learned and Applied Security Best Practices.
- Graduation Project: Developed a secure connection project with Linux systems

Certifications:

- Windows Server 2012: Planning to renew to the latest version.
- Expected: Cisco CCNA, and Linux Administration Certification.

Volunteer Experience:

George Brown College
Toronto, ON

January 2024 – April 2025

- Provided peer assistance in troubleshooting and resolving Linux-related issues during assignments, fostering collaborative learning and enhancing problem-solving skills among classmates.
- Supported students in understanding complex concepts, contributing to a positive learning environment and promoting academic success.

Professional Experience:

Network Technician
Creative Group. Guayaquil, Ecuador

March 2017 – February 2022

- Installed, configured, and maintained network endpoints, including workstations, printers and provided technical support to staff.
- Managed and maintained Linux-based servers, ensuring system uptime, user access control, and performance monitoring.

Interests:

- Recognized on the Dean's Honour List for multiple academic terms, reflecting strong performance and consistent commitment to academic excellence in my field.
